AutoCAD 2017 expands on the capabilities and ease-of-use of previous versions, including a new 3D construction tool and seamless dimensioning with Dynamic Components. With VBA enhancements in the AutoCAD Architecture toolset, AutoCAD is now the fastest way to make an industry standard building. With the new Web Access and Animation tools, you can create web and mobile-ready drawings. The new 3D Extrusion tool makes it easy to create a 3D model of almost any object. Dynamic Components give you the power to change AutoCAD's default look and feel and add new objects, without having to alter the original drawing. In addition to the new features in AutoCAD 2017, enhancements were made to AutoCAD Map 3D and AutoCAD Architecture. A new Import Parametric object enables you to quickly convert external source files into an AutoCAD drawing. With the AutoCAD Map 3D tool, you can create a 3D model of any street in minutes. You can also draw a detailed 2D map with customizable features and base layers. With the new AutoCAD Map 3D extensions, you can import CSV, dBase, DWG, and AutoCAD Layers objects into Map 3D and use them for 2D mapping and 3D modeling. The new AutoCAD Architecture in AutoCAD 2017 also includes improvements in ease of use, speed, and accuracy. You can place and text-draw architectural elements with the new Create Building Tab. The Edit Building Tab offers faster and easier editing of components, such as windows, doors, and roof ornaments. With the new Type Editing Tool, you can view and edit annotations directly in the drawing. The Revisions window lets you view the revisions of a drawing or measure the elapsed time from the revision to the most recent saved revision. Another set of enhancements were made to AutoCAD Layout in AutoCAD 2017. You can now convert 2D drawings into 3D layout drawings, as well as switch between Auto
