### AutoCAD

In April 2013, Autodesk announced plans to rebrand Autodesk AutoCAD as an independent brand. Beginning in August 2013, Autodesk AutoCAD was replaced by Autodesk Inventor. As of March, 2019, Autodesk Inventor is now Autodesk AutoCAD. In a single user context, the AutoCAD software supports the following types of drawing sheets: Drafting sheets : sheets that allow the user to draw or view 2D

or 3D objects. The user can save objects on sheets, and save the sheet data as a sheet file, which can be imported back into AutoCAD when the sheet is needed again. Some object types (including arcs, text, dimension, pipes, splines, and surfaces) are not available on all sheets. The user can use Inventor drawing tools to create new drawing sheets or open drawing files created in other CAD software such as SketchUp or Solidworks. : sheets that allow the user to draw or view 2D or 3D objects. Advanced Inventor In late 2013, Autodesk released Advanced Inventor. It was designed to reduce the learning curve for those coming from other CAD systems. Inventor allows users to import and export components in various CAD formats, and view and edit parts in an exploded view. Inventor was released as a free product in August 2014 for Mac and Windows and as a Premium product in October 2014. Korean developer, E-Device Corporation developed and released Korean language version of Advanced Inventor (?? ?? ?????) on October 15, 2014. Autodesk Inventor was awarded

a Bronze Medal in the 2014 TIA award for best 3D Product in the consumer category. Inventor 2018 is the successor of the 2015 version and has a mobile app for iOS and Android. Other Autodesk products and services AutoCAD Cracked Accounts Architecture, AutoCAD Electrical, AutoCAD Civil 3D, and AutoCAD Mechanical. AutoCAD Map 3D, is a desktop and web map creation software that allows users to create ortho-mapped 3D models of physical surfaces and then edit the data. They can also work directly in Photoshop. It has been called the most sophisticated and user-friendly version of CAD

software ever made. The free version was released on December 12, 2012 for PC, Mac, Linux and Google Chrome OS, with Windows, Mac and Linux versions to follow. AutoCAD Lightning, is a 3D architectural design package, based on the AutoCAD architectural program. Lightning is designed to be easier to use than AutoCAD. AutoCAD LT (released July 2013) is a budget version of AutoCAD, which uses only the basic features of the program. CUBE is a 2D surface modeling program for mobile devices that lets users build complex two-dimensional models. It was first released in 2007 and then re-released
