. A: At the very top of the file you have: %
%% % % I'm not sure why you need the html
in there, but the class should help you. You
can also check out Kaitlyn Devlin's answer to
this problem: [Adding UTF-8 to Wordpress
posts?](#) In an optical recording and/or
reproducing apparatus of the kind in which
an optical source emits an optical beam to be
applied to a recording medium, the spot of
the beam to be formed on the medium by an
objective lens is detected to produce a certain
level of output signal, and the objective lens
is adjusted to vary the spot diameter. In such
an apparatus, it is necessary to detect a
focusing state of the beam on the medium. A
method has been proposed for detecting the
focusing state by detecting the spot diameter
of the beam by means of an optical sensor
such as a PSD, and by providing in the

apparatus a structure for adjusting a diaphragm in the optical path of the beam on the basis of the detection. In the method, however, there are problems that the sensitivity of detection of the spot is low, and that the adjustment of the diaphragm becomes complicated because it must be adjusted in accordance with the detected spot diameter. Mike, We'll discuss that next week.

Vince Michael J Beyer 10/02/2000 09:09 AM
To: Vince J Kaminski/HOU/ECT@ECT
cc: Subject: Scheduling Vince, We are currently meeting with two generators regarding their interest in joining the demand response pilot with Enron and the price we are offering. This meeting is one of two things. First, the generator is visiting with us to discuss their interest in joining the pilot. Second, we are visiting with them to let them

know what kind of products they might have to trade with Enron. A little about the basis we are offering our customers - the generator has no choice. They either have to sell to us at a given price or not. The generator is

pdf by centgacontfootb. container. A: I'll base my answer on this table of content feature found in this question: Capturing the text from an image via DOM Although the question was asked about image-to-text, the OP hasn't specified the problem is with text-to-image. The specification of how to do this is in the same question.

```
loadHTML($html);
$images =
    $dom->getElementsByTagName('img');
foreach ($images as $image) { $image_href
    = $image->getAttribute('src'); $text =
    $dom->loadHTML($image_href);
    $text_array =
    $dom->getElementsByTagName('span');
    foreach ($text_array as $text_node) { $text =
    trim($text_node->nodeValue); $text_new =
```

```
str_rot13($text); $output = ""; $output.=  
    $text_new; $output.= "  
$dom->saveHTML($output); } $image_save  
    = $dom->saveHTML(); $file_save =  
"cocugutanimakveanlamak.png"; // perform  
    save on our image  
file_put_contents($file_save, $image_save);  
$dom->formatOutput = true; } ?>
```

Which results in: At least 10 people were killed and dozens more wounded in two new attacks on Christians in southern Pakistan, and a district chief said a team from a local militia was deliberately bombing people because some of them had abandoned Islam. The attacks, which took place early on Monday in the town of Sangar on the edge of the lawless province of Baluchistan, are the latest in a wave of violence against Pakistan's tiny Christian community. On Sunday, an

unidentified gunman shot dead at least two people on a motorbike 3da54e8ca3
