Adobe Photoshop has a great deal of power — and even more difficult settings — to achieve even simple effects and complicated layouts. To control the features and settings, Photoshop enables you to customize the program with dozens of different layers, adjustment filters, text, strokes, and various other tools. You can customize and modify almost anything in Photoshop. Customizing text on an image includes your choice of fonts and sizes, including such options as Centered, All Caps, or any other font style. Customizing the size, layout, and appearance of basic objects enables you to create the effect you want. Create or modify a lasso with various options. Convert an image to black and white, colorize it, or swap the contrast. Use any of Photoshop's tools to quickly change a color, shape, or look of an object — such as make a circle within a rectangle — and then move it to another location. The more you explore the various options and tools in Photoshop, the more you'll discover the possibilities. Learning how to use Photoshop, or any image-editing program, takes time and practice. You can't expect to create perfect, professional images without a learning curve. Also, it's not enough to have great tools — you also need to know how to use them. What's more, using Photoshop effectively is essential to generating a viable product. The first thing you need to do to start a project is to export your source image in the format in which you plan to create your final file, which is usually Photoshop. Although this book is primarily about Photoshop, I cover some other programs as well. If you need to edit images in Photoshop Elements (see Chapter 14), you can do so as described in this book. For a quick, easy way to use Photoshop's drawing tools, see Chapter 13. Setting Up for the Project Whether you're starting a new or old project, you must decide how to set up your new project before you start to work. As a general rule of thumb, you should create a new document — either on a new layer or, if your project is already set up, open a document with a new layer, add a new layer, or create a new document — and set your settings accordingly. After you do that, you can begin to work in a new layer that will serve as your editing workspace. You don't have to save a new file before you begin to work on the new layer, because you can always get back to your

Ralph Belknap Griffin Ralph Belknap Griffin (February 14, 1881 – May 19, 1951) was a prominent American clergyman. He was born in Montgomery, Alabama, and graduated from Yale University in 1903. Ordained in the Congregational ministry by the American Association of Congregational Churches, he was pastor of the Bowery Avenue Congregational Church in New York City from 1908-1918. He was then a professor of New Testament Greek at the University of Chicago Divinity School until 1948. In 1935, he became professor emeritus. He was vice-president of the American Academy of Religion from 1935-1947. Griffin was a prolific author of commentaries on the New Testament, and was especially well known for his introduction to the writings of Basil the Great. In 1949, he received an honorary D.D. from Westminster College in New Wilmington, Pennsylvania. Schaumburg's first veterinary hospital dating from 1883 For almost two decades now, Schaumburg's veterinary medicine community has been waiting for the construction of a veterinary hospital or clinic on a site that has been under proposal for over 20 years. Now we have that veterinary hospital to help animal lovers in the Schaumburg area. The new St. Anthony Veterinary Clinic opened on July 23, 2011 and features a two story attached garage. This gorgeous building is on a 13,000 square foot lot with about 350 feet of frontage on Joseph T. O'Donnell Drive. Now the other veterinary clinics in Schaumburg will be looking on this "jewel" to see what its future brings. "St. Anthony Veterinary Clinic is owned and operated by Dr. David Fisher and his staff, as well as other well-known veterinarians. They are located on the south side of Route 120 near O'Donnell Drive just east of the interchange with Route 83. David Fisher, DVM, shares the following: "I grew up in a family of eight siblings. Each year we had five cows, a cow/calf operation and five horses. I learned about cows, horses and barns from an early age. I recently retired from the dairy industry and moved to Schaumburg to focus on our 20 year dream of a veterinary clinic. It has been a great experience so far." Dr. David Fisher knows the community and knows the needs of the Schaumburg area. This is a full service, general practice veterinary medicine practice. They have 24/7 emergency services, x-ray capability, surgical services and dental services. Dr. David Fisher is excited about the future of his clinic. "We are looking forward to meeting the needs of our Schaumburg community," he says. "As a neighbor I do care for the people around me. One of the best ways to care for them is to care for their animals. It is important to provide people with the quality of care that they deserve and we are excited to be able to do that." St. Anthony Veterinary Clinic is now open for business. To find out more about this beautiful "jewel" in Schaumburg, the drive to their office and the services they provide call at 847-702-4500 or go to www.stanthonyvet.com.
