## **What's new in Elden Ring:**

### **Prologue**

**I was a youth and still felt the stirring of life. My eyes took in the grand view before me...the land shouldered the sky. Bare brown rocks, sharp, defiant, and ready to spit forth sharp mist and rain.**

### **The Wind Blows**

**It has been more than two years.**

**Worshiping at the altar of the world, chanting the words of prophecy, dreaming of the dream.**

**The moment has at last arrived. Dawn breaks on the world with an unrivaled force.**

**I, Ser Degrow Tarnish, the Star of the Stars, drawn upon by the winds, seek you, the Elden Lord.**

### **Release the Dragons**

**What one of us doesn't as time passes endures until the end. What remains is placed in the hands of grace, the only power strong enough to overcome the will of others. The balance of the world hangs by a thread stretched so taut that even a bubble of air has the weight of eternal death.**

**We, who have always been puppets under their hands, are now free. We have strayed all this time, but now we shall release ourselves from the oppressive past.**

**The time has come to take life into our hands.**

### **The Chambers of Legend**

**I don't understand.**

---

**Where am I?**

**A gentle voice has drifted to me. If it, it has gradually taken on distinct meaning.**

**A voice of encouragement was intended for someone who lacked the courage of his convictions.**

**The Voice of Wisdom**

**Hold your soul and hold back your valor.**

**Hide your hearts. Stop the struggle.**

**Before you encounter the source of fear, you must reach the chambers of legend.**

**The Realm of the Dragons**

**Dear god, I am tearing at**

**--readme--Determination of thiamphenicol in honey and commercial products by reversed-phase ion-pair high-performance liquid chromatography-electrospray mass spectrometry. An analytical method based on HPLC-electrospray ionization-mass spectrometry (HPLC-ESI-MS), with electrospray in the positive-ion monitoring mode, has been developed to determine thiamphenicol in honey and commercial products. The developed method employed a partition chromatographic technique for the extraction of thiamphenicol in honey or other food samples. In particular, the antioxidant propyl- $\alpha$ -tocopherol was used as a solvent for thiamphenicol in honey. The proposed method provides a rapid and reliable determination of this antibiotic at levels below the European Commission proposed maximum residue limits in honey. The method was validated in terms of linearity, selectivity, precision, robustness and accuracy.**
