GAME PLAY ELDEN RING: The atmosphere of the world suddenly changes. The air becomes dense with an iron taste. The atmosphere becomes heavy. There is a feeling of distancing yourself from the world. A feeling of threat. The game opens in the dark gray castle. The game begins with PICA (the player character) from the Lands Between, visiting his hometown in the countryside. PICA is a small child who loves to ride on his horse and can play with a variety of charming weapons, including a guitar, a sling, and a spade. A short time later, PICA grows up, and the fate he set out on as a small child soon comes to a head. The landscape turns into a forest, and PICA encounters the other characters: GIANE (a lovely young woman who wields a great sword and is known as "the fearless and mighty sword girl"), TANNER (a young man of unrivaled endurance who fights using a powerful combination of weapons), and MATSU (an old man who wields a great pole-arm). -- This is the opening of the game. As you play, you will unravel the story from there. OVERVIEW OF THE CASTLE The Castle is a huge tower. When facing the east side of the Castle, the tower is slightly tilted, which is the direction the sky is set in. To the west is where the sun rises. The height of the tower is also taller than that of an ordinary castle, and there are many windows in the walls, which look like eyes. The tower is made of a dark gray stone. To the south is a small garden of flowers, and to the north is the main gate. The gate is protected by two massive iron gates. In the center of the gate is a large stone door with a sliding door in front. The inside of the gate is decorated with a rock pattern. Large and small slabs of the stone are set closely together. The structure looks somewhat reminiscent of the ruins of a huge stone structure built by an ancient civilization. When the player character enters the Castle, the torch flickers once, and the daylight sets off the flickers. The last flicker disappears, and the inside of the gate becomes pitch-black, in which the player cannot see anything. The town is visible here. The town is in the forest, and it looks like a small village that

**Jahangiri, Zanjan Jahangiri (, also Romanized as Jahangīrī; also known as Takht-e Jahangīrī and Takht-e Jahāngīrī) is a village in Zanjanrud Rural District, Zanjanrud District, Zanjan County, Zanjan Province, Iran. At the 2006 census, its population was 856, in 243 families. References Category:Populated places in Zanjan CountyTransportation It seems every day I read about another transportation crisis. There are the back-up freeways, the demand for more roads, the threats of bankruptcies due to rising fuel costs, and even imminent deaths due to our inability to control excessive emissions. My hope is that society will be willing to make some very difficult decisions in order to address these problems and enjoy the benefits of high-quality transportation. That may sound implausible, but I think it can be done. The alternatives are unpalatable and everyone will complain. For example, do we really think we can start pricing people off the road? That's an idea some economists have been recommending for some time, but they do so in the alternative of being unable to drive. In fact, the economists are right. We must make tough decisions, but doing that allows us to keep driving as well as we do now. I can no longer count on being able to commute every day. Already, I'm thinking about living in a more rural area. Moreover, I'll have fewer of my usual conveniences, like a home cooked meal and laundry done by someone else. But I can go out for dinner, read a book at night, and I can run errands in the car. On the other hand, I can't count on the highways**
