I need to match the value of the combobox with the value of a specific index in the ObservableCollection. I've tried: MyComboBox.SelectedValue = myObservableCollection.Select(i => i.myClassName.Name).First() But this returns a List. My ObservableCollection is a List of each class type. I only have one value that I would like to copy into the ObservableCollection for that class. A: You can use List.Find() to search the list of objects for the exact value you are looking for.
