Photographers got the news in their prompt on their computer, but also received an email from their App Store account. Managing firmware updates has been simplified for users who have autoupdates turned on, and the company decided to implement the change in this release. It's available for Photoshop CC 2015 and the subscription version if you pay for Lightroom Extended. 8.0 has a number of major changes such as smart previews, bezier selections, the ability to preview images as HDR. This enables it to help you provide all the administrative support you need, such as enabling people access to pictures. Various tutorials will show you how to do that.
